

Hackathon

The objective of the hackathon is to solve a set of questions related to a problem backed by data and present solutions in visual form.

1. The dataset and goals will be provided to the students on the day of hackathon
2. The data may need preprocessing
3. Hackathon is a team effort spread over two days
4. The team members can start off with a board plan then divide the work and attempt tasks individually
5. The individual components need to be stitched together into one report and submitted
6. There will be one hour of QnA where the students can ask questions
